

Sage TimeSheet | Top Seven Enhancements

Version 9.7 to 9.85

Sage TimeSheet v9.7 May 2008

Easily define tasks, enter time, export pay calculation data, or update time-off balances to Abra Payroll through improved integration with Sage Abra HRMS.

Update all Sage TimeSheet client stations with the latest version more quickly than ever with an improved installer, which allows more flexibility in distribution.

Streamline approval processes with e-mail notifications to additional managers (such as Project Managers) who need to approve time associated with their projects.

Quickly send actual and/or prorated hours into Sage MAS 90 Timecard or Accounts Receivable.

Protect vendor information by not allowing time entry contractors to see tasks that aren't assigned to them by making jobs dependent on an employee in Sage MAS 90.

Ensure invoices are concise by sending summary times from Sage TimeSheet into Sage MAS 90 Accounts Receivable.

Easily transfer expenses from Sage TimeSheet into Sage MAS 90 Accounts Receivable or Accounts Payable.

Sage TimeSheet v9.8 March 2009

Speed up mass time entries (such as holiday pay) with the new capability to perform a mass time-entry update automatically for all or select employees.

Easily customize the time sheet view with adjustable column widths.

Quickly remove unwanted tasks from the task list simply by marking a task as complete.

Simplify time entry with the new highlight of Task rows in timesheet view.

Improve time entry with a new configuration option in the timecard view in which modifying the start time doesn't impact the end time.

Speed up time entry by using periods instead of a colon when entering time.

New integration for Abra SQL Payroll gives you the flexibility previously available only for Abra Suite to easily define tasks, enter time, export pay calculation data, or update time-off balances.

Sage TimeSheet v9.85 January 2010

Save time by easily integrating with multiple Sage products simultaneously, such as Sage Abra and Sage MAS 500.

Easily locate timesheets needing approval by sorting columns in the group manager window.

Choose any name for projects, phases, tasks, or resources in different companies without worrying about duplication since Sage TimeSheet now handles multiple instances.

Reduce onscreen clutter with the option not to include the company name on all components in Sage MAS 500.

Easily assign resources to tasks in TimeSheet by using the Project Roster in Sage MAS 500.

Automatically assign the supervisor within Sage Abra HRMS as the group manager within Sage TimeSheet.

Choose whatever time interval your company requires for data transfer within Sage MAS 500.
